Lorenzo Remy

Los Angeles, CA | (310) 340-3844 | US Citizen
lorenzoremy1999@gmail.com | linkedin.com/in/lorenzo-remy | Portfolio: lorenzoremy1999.github.io/

EDUCATION

Loyola Marymount University **Los Angeles, CA**
Bachelor of Science in Engineering (B.S.E.), Mechanical Engineering May 2025

SKILLS & CERTIFICATIONS

Engineering: Mechanical Design & DFM | Systems Integration & Packaging | Test Planning & Validation | Structural Analysis | FEA | DFMEA | GD&T | Requirements & Configuration Management | Failure Analysis/Root Cause | Technical Communication
Software: SolidWorks CAD | MS Office | Sciforma PPM | Milestones Professional | CPAD (Boeing Lifecycle Architecture Tool)
Manufacturing & Prototyping: Additive Manufacturing (PETG, PLA) | CNC Machining | Sheet Metal | Injection Molding
Standards & Certifications: ASNT NDT Level II (MT: Magnetic Particle Testing, UT: Ultrasonic Testing) | API | ASME | DS-1

PROFESSIONAL EXPERIENCE

The Boeing Company **Everett, WA**
Eco Demonstrator Program – Systems Engineer Intern May – July 2024

- Evaluated 100+ emerging aviation technologies across avionics, propulsion, and structures for 737, 787 and 777 flight-test integration to advance U.S. sustainable aviation.
- Matured 30+ technologies for assembly and flight test with Principal Investigators to select systems for further funding.
- Presented technology assessments and recommendations to senior leadership, informing program investment decisions.

Airplane Level Engineering Integration – Systems Engineer Intern May – July 2023

- Led a 6-person team to construct and load-test a full-scale 777-8F cargo door safety barrier mockup, mapping airframe dimensions and mounting points to validate a clean sheet hardware design.
- Applied MBSE to architect lean Agile-V hybrid frameworks and optimize cross-functional workflows for future initiatives.
- Leveraged critical-path charts and historical data to optimize active 737 and 777 trade-study workflows and task fidelity.

Reliability Maintenance Services Limited **Point Lisas, TTO**
Mechanical Assistant/Tool Coordinator April – May 2021

- Overhauled compressors per API 617, performing inspections and non-conformance tracking to support plant maintenance.

Rapid Oilfield Services Limited **Marabella, TTO**
Operations Supervisor August 2018 – January 2021

- Scaled operations into Guyana, mobilizing crews and equipment to become the primary NDT contact in an emerging market.
- Performed MT and water-coupled UT on oilfield equipment per DS-1 and API to ensure operational compliance.
- Supervised ~50 personnel across international operations, managing scheduling, logistics, and QA/QC verification exercises.

ENGINEERING PROJECTS

Loyola Marymount University **Los Angeles, CA**
NASA Student Launch Initiative – Mechanical Design Engineer August 2024 – May 2025

- Led a 6-person team through mechanical design, packaging, and subsystem integration of a launch vehicle, utilizing iterative CAD to reduce structural mass by ~25% while maintaining strict load and stability margins.
- Designed and built custom 3D-printed avionics trays and motor mounts; produced GD&T drawings to support assembly.
- Orchestrated a project-wide material transition from PLA to PETG and redesigned integrated bulkheads as modular components following impact-load testing to improve toughness and landing durability.
- Engineered an internal rail integration system to eliminate a torsional degree of freedom for reliable airbrake deployment.
- Developed subsystem test plans, validation procedures, and vehicle assembly workflows for full scale launch qualification.

Cross-Functional DFMA Electro-Mechanical Hardware – Mechanical Design Engineer April – May 2025

- Designed and sequenced sheet metal and CNC components, optimizing manufacturability, assembly and unit cost.
- Engineered environmental sealing and versatile mounting interfaces to maximize product longevity and serviceability.

ADDITIONAL EXPERIENCE

The Math Yogis **Los Angeles, CA**
Math Tutor October 2025 – Present

- Deliver K-12 math instruction across 20+ sites, tailoring concept delivery to ensure student comprehension.
